VENTUM

KITEBOARDING

Bar tip & tricks

- Scan the NFC tag and register your bar for free
- Scan the QR code for a video showing the correct method to wind your bar after session
- Rinse your bar with fresh water after each session
- Always check your lines and QR before use
- Remove knots in your flying lines. They reduce line strength with 50%
- Replace lines when damaged or worn
- Re-calibrate your bar after the first session. Then, re-calibrate each 3 months.
